

IT'S JUST AN IDEA.

An idea worth protecting. So talk to us before you tell your golf buddy, who tells his accountant, who tells her brother who happens to be married to the city's most successful venture capitalist. Our Intellectual Property practice develops and protects the technology assets and intellectual property of a broad spectrum of clients. While your Research & Development team is focusing on their next great idea, our IP team is already protecting it. When it comes to technical capabilities, communication skills, pragmatic legal counseling, and litigation experience, we go beyond the expected. Calfee – move forward with confidence.
